

Dear Business Partners and Friends,

We proudly announce the official release of the DNA High Performance Stage-3 Intake Kit **AK-R56MK3-S3** specially designed for the "Mini S R56" (NON MAF VERSION).

More specifically:

- R56 S 07'-10'
- R57 S Convertible 09'-10'
- R55 S Clubman 07'-10'

This new Bolt On High Performance Stage 3 Intake Kit from DNA, features:

- Extreme air flow **5790 LTR/MIN@15** Inches of water; the result is an impressive **" +43.50% "** increase in air flow! Over the stock air box & filter!
- Drops the intake charge temperature by 15 Degrees Celsius! Installed "In front" of the engine!
- Dyno proven +15 up to +20 HP more wheel power, depending on the tune state of the engine!
- Incredible engine response & Sound!
- Specially designed & CNC Machined from billet Aluminum Alloy Intake velocity stack adapter, directly installed on the turbo via a special DNA Elastomer connection.
- Adapter features DNA's Innovative **Conical/ Elliptical design & "Golf Ball"** Effect texture on the surface that eliminates drag in the adapter at high air speeds. During testing & development we recorded an air of 470 km/h at the turbo side of the adapter!
- Custom purpose designed DNA High Performance Cone Filter with large internal volume.
- 98-99% filtering efficiency for maximum engine protection
- Epoxy coated "Heat Shield" with LEXAN transparent cover, which protects the filter and keeps hot air out and cold air in
- DNA Crank case vent filter with all the necessary hardware for installation included
- Includes specially designed bracket & all necessary hardware to relocate the 'coolant water expansion tank' from front to rear of the engine
- Includes custom made SAMCO Silicon tubes for the 'coolant water expansion tank' & Fluoro Silicon for the 'crank case vent
- Available in 9 catchy color combinations to choose
- Shipped ready to install, including 'photo installation info, dyno Graphs, and air flow Graphs
- For road, race and track use
