

Dear Business Partners and Friends,

We proudly announce the official release of the  
 DNA Stage 2 Filter *RV-95-155-RX8* for the:  
**MAZDA RX-8 1.3L 03'-12'**

- This new unique DNA Clamp-On Filter is developed in co-operation with EasyTuning, a Mazda RX-8 Specialist located in Greece.
  - Designed to be installed "inside" the air box replacing the stock panel filter.
- Installing a Clamp-On Air Filter "inside" the stock air box, noise levels are maintained low and the application remains legal for road use as long as the air box is kept closed. At the same time Power, Torque and throttle response are increased.
- Installation of this new DNA Stage 2 Clamp-On Air filter is very easy; simply follow the installation 'step by step' instructions included with the DNA filter.
  - The filtering efficiency<sup>1</sup> is extremely high at 98-99% filtering efficiency (ISO 5011), with 4 layers of DNA<sup>®</sup> Cotton.
  - The flow of this new DNA Stage 2 Clamp-On filter is +13.78% more than the MAZDA stock panel filter!

*DNA Stage 2 Clamp-On air filter flow: 193.10 CFM*

(Cubic feet per minute) @3"H<sub>2</sub>O corrected @ 25degrees Celsius

*MAZDA stock panel filter: 169.70 CFM*

(Cubic feet per minute) @3"H<sub>2</sub>O corrected @ 25degrees Celsius

- This DNA<sup>®</sup> S2 filter is designed as a High flow Air filter for:  
**'Road & Race use'.**

1

Filtering efficiency is the amount of "dirt" the filter can maintain (stop) and protect the engine efficiently. For example the DNA<sup>®</sup> Filter for every 100 grams of dirt that it will receive, it will hold 98-99 grams, this applies even to fine dirt as small as 5 microns.
