

Dear Business Partners and Friends,

We proudly announce the official release of the  
*P-K10S10-0R* DNA air filter for the: **KAWASAKI**

- ✓ **Z1000 10'-12'**
- ✓ **NINJA 1000 10'-12'**
- ✓ **VERSYS 12'**

- This New filter features DNA<sup>®</sup>'s advanced FCd<sup>1</sup> (Full Contour design).
- Installation of the filter is very easy; simply follow the information that can be found in the KAWASAKI workshop manual.
- The filtering efficiency<sup>2</sup> is extremely high at 98-99% filtering efficiency, with 4 layers of DNA<sup>®</sup> Cotton.
- The flow of this New DNA FCd filter is high, +26.60% more than the KAWASAKI stock paper filter!

*DNA FCd air filter flow: 181,40 CFM*

(Cubic feet per minute) @1,5"H<sub>2</sub>O corrected @ 25degrees Celsius

*KAWASAKI stock paper filter: 143,20 CFM*

(Cubic feet per minute) @1,5"H<sub>2</sub>O corrected @ 25degrees Celsius

KAWASAKI

Z1000 10'-12'/ NINJA 1000 10'-12'/ VERSYS 12'

DNA<sup>®</sup> FILTERING EFFICIENCY

### 98-99% ✓

---

AIR FLOW DATA MEASURED WITH DNA'S  
ROTRONICS FLOWSCAN COMPUTERIZED FLOWBENCH

1

FCd (Full Contour design) is the innovative design by DNA<sup>®</sup>, that allows the filtering material to follow precisely the contour of the air box and uses the complete air box surface as "active filtering area" eliminating "dead spots" that cause turbulence, increasing air flow and filtering efficiency.

2

Filtering efficiency is the amount of "dirt" the filter can maintain (stop) and protect the engine efficiently. For example the DNA<sup>®</sup> Filter for every 100 grams of dirt that it will receive, it will hold 98-99 grams, this applies even to fine dirt as small as 5 microns.
