

INSTALLATION INFO for DNA R-HD17CR21-0R

Application: HARLEY DAVIDSON 107-114 CI 2017-2021 models

The **DNA High Performance Filter R-HD17CR21-0R** is designed to replace the stock HARLEY DAVIDSON air filter and increase the airflow, filtering efficiency, Power and Torque.

1. Remove the stock air box cover and the air filter from the bike, following the instructions found in the official HARLEY DAVIDSON workshop manual.
Be very careful when removing the stock filter, so debris doesn't fall inside the inlet.
2. Together with the air filter, you will also **remove** a small breather hose which is attached on the two iridium plated breather bolts.
Check picture below.

3. This breather hose **won't be used** with the installation of **R-HD17CR21-0R**, both iridium plated breather bolts will clap on the DNA Filter on the two mounting holes of the bottom plate. Both holes can be seen on the photo below, **highlighted in red.**

Please note that this SKU is for **"RACE USE ONLY"**
Service every **15.000 km** or earlier when used in extremely dusty environment.
Use the dedicated **DNA Service Kit DSK-3001** (sold separately) to clean and re-oil, following the instructions included with the service kit.
The manufacturer and seller make no warranties express or implied which extend beyond the description of the goods contained herein.
Any description of this product is for the purpose of identifying it and shall not be deemed to create an express warranty.
