

Dear Business Partners and Friends,

We proudly announce the official release of the
DNA High Performance Air Filter **P-BE7E23-01**,
for the following BENELLI models:

- ✓ TRK 702 23'-24'
- ✓ TRK 702 X 23'-24'

- This filter features DNA®'s advanced FCd¹ (Full Contour design).
 - To install this new DNA Air filter follow the installation instructions included in the workshop manual.
 - The filtering efficiency¹ is extremely high at **98-99%** filtering efficiency (ISO 5011), with 4 layers of DNA® Cotton.
 - A perfect airtight sealing and trouble free filter installation for the user is guaranteed by using a high quality **EVA seal**, which is precisely cut and factory installed (glued).
 - DNA Filters are supplied pre-oiled from our factory. The correct amount of DNA oil is applied on each filter individually.
 - The flow of this new DNA filter is **+15.30 %** more than the stock filter!
- DNA air filter flow: **185.50 CFM**
(Cubic feet per minute) @1,5"H₂O corrected @ 25degrees Celsius
- OEM stock filter's flow: **160.90 CFM**
(Cubic feet per minute) @1,5"H₂O corrected @ 25degrees Celsius
- This DNA® filter is designed as a High Flow Air filter for:
'Road & Off Road use'.

1  FCd (Full Contour design) is the innovative design by DNA®, that allows the filtering material to follow precisely the contour of the air box and uses the complete air box surface as "active filtering area" eliminating "dead spots" that cause turbulence, increasing air flow and filtering efficiency.

2  Filtering efficiency is the amount of "dirt" the filter can maintain (stop) and protect the engine efficiently. For example the DNA® Filter for every 100 grams of dirt that it will receive, it will hold 98-99 grams, this applies even to fine dirt as small as 5 microns.
