

## INSTALLATION & GENERAL INFO

### DNA P-ME6S14-S2 Stage 2 Air Filter Kit

For the Mercedes Benz/AMG 63 15'-17'

The *DNA STAGE 2 P-ME6S14-S2* Air Filter Kit is designed to replace the stock air filter and increase the Airflow, Power, Torque and Throttle response.

***Specially developed for Race & High Performance road applications.***

Attention! The installation must be carried out by a qualified mechanic.

#### **P-ME6S14-S2 Stage 2 application**

- Designed to increase the airflow as a filter and highly improve the airflow dynamics of the air box/air filter assembly, maintaining a filtering efficiency of 98-99% according to ISO 5011.
- Air flow of the filter is 6.481 ltr/min @ 3,74 mbar vacuum (Typical industry standard measurement) +30.83% compared to the std paper element.
- Air box / air filter assembly is radically improved, the DNA S2 filter allows 28.5mm more area under the filter, eliminating pressure drop and increasing air circulation.

Photo of the left air box 'cut' to show DNA S1 air filter that allows 28.5mm more area at position A.

- Additionally, the DNA S2 air filter "does not protrude"! in the intake passage of the bottom part of the air box, allowing the unrestricted air flow!

Photo of the left air box showing the DNA S2 air filter NOT protruding  
And allowing the unrestricted air flow!

e. **Conclusion**

The DNA S2 P-ME6S14-S2 is a perfect choice for Highly tuned cars that exceed 700 hp and can 'handle' horsepower up to 1100 hp.

**Important Note:** the DNA P-ME6S14-S2 is a complete kit, including 2 air filters and the necessary 'special' screws to assembly the air boxes. The top air box will 'sit' 20mm higher and it will be necessary to re-check and re-arrange the fitting of the plastic decorative engine covers.

Thank you for choosing DNA High Performance Filters. Enjoy your ride and drive safely.

**Notice:** *Re- mapping your ECU is recommended if you want to fully take advantage the high flow.*

**Although this kit does not modify the air box and the vehicle's technical specifications, in some countries it may not be legal for road use. Please check the local regulation!**

**For race or closed circuit use only.**
