

NEOLINE  
**G-TECH X53**

**NEOLINE**

Dual channel DVR

## REMOTE CONTROL

Neoline G-Tech X53 master unit, rather than traditional car video recorders, is installed in a secret place, while its compact camera is so small that it doesn't draw attention. As a result, the device is installed only once, no need to constantly dismount it while parking.

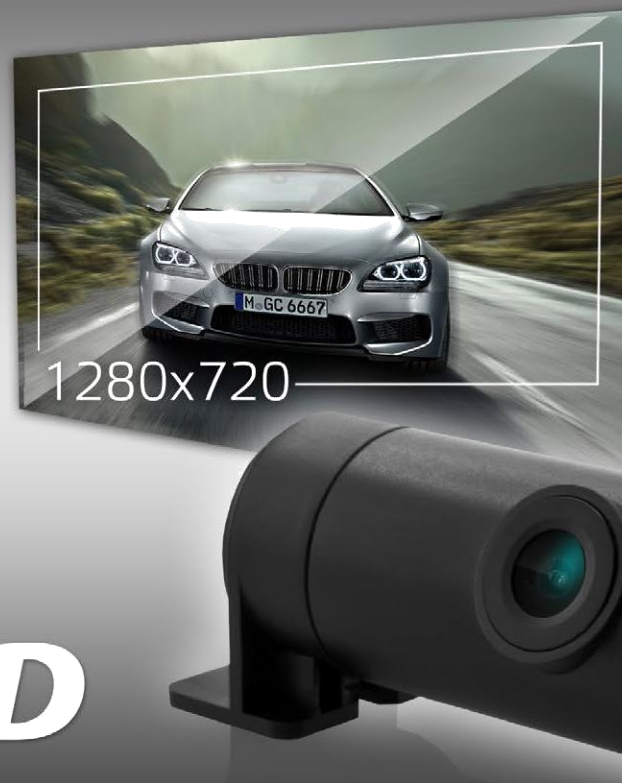

## WI-FI SMARTPHONE CONNECTION

G-Tech X53 is equipped with a Wi-Fi module, an App Store and Play Market applications available for users, allowing to set up the car video recorder, save required files to your smartphone or publish the video online.

**FULL  
HD**

**HD**

## DUAL-CHANNEL RECORDING

Neoline G-Tech X53 car video recorder is equipped with a front-facing Full HD camera, as well as an auxiliary HD camera to record all nuances of the traffic situation behind the car.

## PARKING MODE

Parking mode, enabled by the impact sensor or motion sensor, and compact camera size of the G-Tech X53 device allow discreet recording at the parking lot. In case of traffic accidents, the video recorder will save a video file of the event on a memory card.

## SONY SENSOR

Using a highly sensitive SONY sensor, Neoline G-Tech X53 records Full HD video during both daytime and night time.

## GPS/GLONASS

Neoline G-Tech X53 is equipped with an external GPS/Glonass module. A video is not only stamped with date, time and car plate number – car velocity and coordinates are added, to reinforce the evidential base in case of road traffic accidents.

## SEVERE WEATHER PROTECTION

Neoline G-Tech X53 is equipped with a capacitor, not a regular battery. Capacitors are much more resilient to high temperatures and show long-life performance. Installation of capacitors solves many typical problems of car video recorders: overheating, explosive hazard of a battery, loss of latest files.

## RELIABILITY IN EVERY DETAIL

Neoline G-Tech X53 is a joint product of leading Korean and Russian specialists in car electronics, designed to enhance driver safety. Neoline G-Tech X53 is a perfect combination of Korean quality and reliability, as well because of the latest data processing algorithms and innovative technologies.

## NEOLINE G-TEC H X53 SPECIFICATION

- Installation type: hidden, separated
- Video definition:
  - main camera Full HD 1920\*1080 (30 f/s)
  - auxiliary camera HD 1280\*720 (30 f/s)
- Visibility angle:
  - main camera: 130 °
  - auxiliary camera: 130°
- Video recording format: MP4
- Internal capacitor
- MicroSD memory card supported, 10 + class, 8-64 Gb
- Loop recording interval, min: 1/2/3
- Automatic power and shutdown
- Wi-Fi smartphone connection
- Working temperature range:
  - operation: -10C° - +70C°
  - storage: -30C° - +80C°
- Date/time stamp
- Sound recording (with external microphone connected)
- Internal speaker
- G-sensor
- Motion sensor
- Parking mode
- Input voltage: DC 12-24V
- Master unit support: 3M textile fastening, bundle ties, tapping screws
- Camera support: 3M band
- Dimensions: 69\*111\*21 mm
- Weight: 100 g.

## EQUIPMENT:

- DVR Neoline G-Tech X53 – 1 pcs
- Front camera – 1 pcs
- Rear camera – 1 pcs
- Power cord to fuse box – 1 pcs
- GPS/Glonass antenna – 1 pcs
- Wired button to block files from overwriting – 1 pcs
- MicroSD card – 1 pcs
- Plastic ties – 4 pcs
- Screws – 4 pcs
- Fastening elements for camera cable – 6 pcs
- Connector for wires – 2 pcs
- Textile fastener (Velcro) with double-sided scotch – 1 pcs
- Microphone – 1 pcs
- User manual – 1 pcs
- Warranty card – 1 pcs
